# THE SKIN SOLUTION

The complexion is the extrinsic reflection of intrinsic vitality. Skin aging occurs because of lifestyle variables that have an impact on complexion metabolic pathway functions over time coupled with 9 aging factors. These are oxidative damage, cellular waste, glycation, telomere shortening, DNA damage, inflammation, cellular energy decline, insulin resistance, and hormonal decline. Also known as the third kidney the face is used as a diagnostic leger in "face reading" methods accepted in Asian medicine.

We harness a wide range of modalities to help awaken the complexion's innate regenerative powers. These include but are not limited to:

- Lasers
- Micro-needling
- PRP and Stem Cell
- Micro-surgery
- Fat transfer
- Lipo suction
- Fillers and neurotoxins
- Hair restoration
- Microdermabrasion
- Chemical peels.
